

Date _____

Name _____

Converting Linear Equations

A. Write the equations below in Slope-Intercept Form. State the slope & y-intercept.

1. $x + y = 6$

2. $2x - y = 6$

3. $x - 2y = 6$

4. $5x + 3y = 15$

5. $3x - 5y = 15$

6. $9x - 2y = 18$

B. Write the equations below in General Form. State the x & y intercepts.

1. $y = 3x - 2$

2. $2x - 3(4 - y) = 1$

3. $\frac{3}{7}x - \frac{1}{3}y = 6$
